## Develop New Accessibility Skills

Welcome to the ERASMUS+ Certified Digital Accessibility Training project!

We contribute to digital accessibility for all by developing skills framework, identifying job roles, developing curricula, and trainings for various professionals that co-create the web.

If you are interested in digital accessibility visit our [website](#) where you can learn about digital accessibility on our [e-learning platform](#).

# Digital Accessibility

Erasmus+ Certified Digital Accessibility Training project started in September 2018 in order to meet the specifications of the European legislation, [Directive \(EU\) 2016/2102 on the accessibility of the websites and mobile applications of public sector bodies](#), which directs that all websites and mobile apps of public sector need to be accessible to all by the year 2020. The project includes 6 partnering organizations from four participating European countries: Slovenia, Poland, Greece, and Spain. These partners have been together developing a Certified Digital Accessibility Training, which is offered to diverse groups of key stakeholders as a response for increasing labor market needs for expert in the field of digital accessibility in Europe.

## Learn about [Digital Accessibility](#)

---

The Certified Digital Accessibility Training aims to strengthen professional development of professionals who co-create the web, trainers, teachers and others interested in digital accessibility. The training courses developed can be conducted in the form of:

- Organized combined training, partly through independent work on an online learning platform, partly by participating in stationary or virtual workshops, where learners perform practical tasks.
- Independent e-learning on [an online learning platform](#).

We have developed training courses for:

Digital  
Accessibility  
*Manager*

Digital  
Accessibility  
*Tester*

Web Developer  
with expertise  
in Digital  
Accessibility and

Web Designer  
with expertise  
in Digital  
Accessibility

The MODULES  
developed for these  
courses are:

(1)  
Introduction  
to Digital  
Accessibility

(2)  
Managing  
Digital  
Accessibility

(3)  
Developing/  
Programming  
for digital  
accessibility

(4)  
Designing  
for digital  
accessibility

(5)  
Implementation  
of digital  
accessibility

(6)  
Evaluation  
of digital  
accessibility

Each learning unit consist of topics addressed in lessons through:

pre-class for individual learning, • in-class for practical exercises • post-class activities with online quizzes available on the e-learning platform.

Additional learning resources are provided to deepen your knowledge or understanding.
